

### Golden Myth

“Golden Myth” is a 5-reel video slot with 40 paylines. The game has 12 different symbols, including a Wild symbol and a sticky Extra Wild symbol.

#### Game flow

Before starting a game round, the player can set the bet using the “BET” control to set the bet per line value and the active payline count. The bet value does not change between game rounds, it remains constant, unless the player decides to change it. A game round is started by pressing the “SPIN” button.

The “BALANCE” field displays the available amount of money for the player. The field “WIN” displays the amount of money that the player won during his last game round.

The “BET” field displays the amount the player wagers in a game round. Prior to starting a new game round, the whole amount from the “WIN” field is transferred to the

“BALANCE” field. By pressing the “MAX BET” button the maximal values for the line bet and active payline count are set with regard to player’s balance.

Pressing the “AUTOPLAY” button opens the “AUTOPLAY” settings where the player can choose the number of rounds played automatically, without pressing the “SPIN” button to start a game. The “AUTOPLAY” function is interrupted in one of the following cases:

- the player does not have enough money in the “BALANCE” field to play the next game round
- the Free Spins feature starts
- the Free Spins feature ends
- the selected number of spins has been played
- the player presses the “AUTOPLAY STOP” button

#### Paytable

The payable displays values that multiply the total bet wagered based on the winning combination.

**Paylines**

Winning combinations pay leftmost to right based on consecutive symbol count and only on paylines with the most winning symbol occurrences for the given symbol. Only the highest winning combination on a payline is paid. Simultaneous wins from different paylines add up. The game is always played on all paylines.

**Bonus game “GAMBLE”**

If a player wins any amount, he can try to double it. The “GAMBLE” bonus game can be started by pressing the “GAMBLE” button, even in case “AUTOPLAY” is active. The player can end the “GAMBLE” bonus game by pressing the “COLLECT” button.

In the “GAMBLE” bonus game the player has to pick the red or black color. In case his pick matches the next revealed card’s color, his current win is doubled. He can continue to play the “GAMBLE” bonus game as long as he does not lose, or reach the limit. Collecting the win ends the gamble feature.

The amount gambled can be reduced to half by pressing the “HALVE” button. The other half is credited to the player’s balance. In case the amount expressed in cents cannot be split into 2 equal parts, it is split as follows:

Amount gambled:  $((\text{amount} * 100) - 1) / 200$   
 Amount credited to balance:  $((\text{amount} * 100) + 1) / 200$

The minimal amount that can be gambled after halving is 0.1 €.

The last five revealed cards are displayed in the bottom half of the screen.

**Bonus game “Free Spins” with extra Sticky Wilds**

Wild symbol substitutes for all symbols. When 3 or more Wild symbols land anywhere on the reels during the base game, the player is entitled to play the “Free Spins” bonus game according to the paytable. Wild symbols cannot retrigger the Free Spins feature.

During Free Spins, when sticky Extra Wilds symbols appear on the reels, they remain in place until the end of Free Spins. Each new sticky Extra Wild pays 1x total bet and awards 1 additional Free Spin. When a sticky Extra Wild symbol lands on a position with an already present sticky Extra Wild, neither the payout nor the additional Free Spin is awarded. A maximum of 20 additional Free Spins can be won during the Free Spins feature.

During the “Free Spins” bonus game, no money is subtracted from the player’s “BALANCE” on a spin. The free spins are played with the same bet as the game round which awarded the “Free Spins” bonus game. Wins are accumulated in the “WIN” field during the “Free Spins” bonus game.
