### **Moonlight Fortune**

"Moonlight Fortune" is a 5-reel video slot that can be played on 20 or 40 paylines. The game has 12 different symbols, including Wild and Bonus symbol.

# Game flow

Before starting a game round, the player can set the bet using the "BET" control to set the bet per line value and the active payline count. The bet value does not change between game rounds, it remains constant, unless the player decides to change it. A game round is started by pressing the "SPIN" button.

The "BALANCE" field displays the available amount of money for the player. The field "WIN" displays the amount of money that the player won during his last game round. The "BET" field displays the amount the player wages in a game round. Prior to starting a new game round, the whole amount from the "WIN" field is transferred to the "BALANCE" field. By pressing the "MAX BET" button the maximal values for the line bet and active payline count are set with regard to player's balance.

Pressing the "AUTOPLAY" button opens the "AUTOPLAY" settings where the player can choose the number of rounds played automatically, without pressing the "SPIN" button to start a game. The "AUTOPLAY" function is interrupted in one of the following cases:

- the player does not have enough money in the "BALANCE" field to play the next game round
- the Free Spins feature starts
- the Free Spins feature ends
- the selected number of spins has been played
- the player presses the "AUTOPLAY STOP" button

# Bonus game "GAMBLE"

If a player wins any amount, he can try to double it. The "GAMBLE" bonus game can be started by pressing the "GAMBLE" button, even in case "AUTOPLAY" is active. The player can end the "GAMBLE" bonus game by pressing the "COLLECT" button.

In the "GAMBLE" bonus game the player has to pick the red or black color. In case his pick matches the next revealed card's color, his current win is doubled. He can continue to play the "GAMBLE" bonus game as long as he does not lose, or reach the limit. Collecting the win ends the gamble feature.

The amount gambled can be reduced to half by pressing the "HALVE" button. The other half is credited to the player's balance. In case the amount expressed in cents cannot be split into 2 equal parts, it is split as follows:

Amount gambled: ((amount \* 100) - 1) / 200

Amount credited to balance: ((amount \* 100) + 1) / 200

The minimal amount that can be gambled after halving is 0.1  $\ensuremath{\varepsilon}$  .

The last five revealed cards are displayed in the bottom half of the screen.

## Wild symbol

The "Wild" symbol substitutes for all symbols, except "Bonus".

# Bonus game "Free Spins"

In case 3 "Bonus" symbols land on the 2nd, 3rd and 4th reels, independent on their position (scatter), the player is entitled to play 6 free spins in the "Free Spins" bonus game. During the "Free Spins" bonus game, more free spins can be acquired. During the "Free Spins" bonus game, no money is subtracted from the player's "BALANCE" on a spin. The free spins are played with the same active payline count and bet per line settings as the game round which awarded the "Free Spins" bonus game. Wins are accumulated in the "WIN" field during the "Free Spins" bonus game.
