## **Introduction**

In Burning Keno the player picks up to 10 numbers from the board, in the range of 1 to 80.

During the games 20 numbers are drawn. The winnings are paid out according to the payable depending on the matches between the player's choice and the drawn numbers.

## **How to Bet**

To start the game, the player should first select the numbers they want to play with and then place their bets by pressing the "Bet button". The numbers picked are in the range of 1 to 80. The player can either pick their numbers from the board manually, or can play with a random set of numbers comprising 1 to 10 numbers each. Selecting at least one number from the board makes the bet valid. It is possible for the player to play with both manually selected combinations and random ones. Through the "Inner menu" button the player can see the current and the last bets placed. As for "Last bets", from there the player has the opportunity to select a combination he has previously played with and place the same bet again. When opening the game at first, the lowest bet value is always selected by default. The denomination and the bet value can be changed through the "Bet settings" button.

The time for placing bets for each draw is limited to 60 seconds. Once a valid bet is placed it is displayed immediately on the screen, so the player can swipe through all picked combinations. The maximum bets per draw are 450. After the betting time in the indicator runs out, the draw starts and the bets are arranged according to the matching numbers.

## Game Controls

The following fields appear on the screen:

Button	Name	Description
	Random selection	When activating any of these buttons, a random selection of respective set of numbers on the board is made. These buttons are inactive when the numbers are being drawn.
	Shuffle	Upon activation of this button, the player shuffles the current combination on the board. The button is inactive when the numbers are being drawn.
	Delete	When activating this button, all numbers are removed from the board. The button is inactive when the numbers are being drawn.
	Bet button	Upon activation of this button, the current combination on the board is selected and the bet is placed. The player can see all their placed bet combinations on the screen. Once a number combination is selected, the player is provided with dynamic payable information which is a real-time calculation of the payouts based on the numbers selected and the bet's value, thus showing potential win based on the count of the selected

		<p>numbers. A bet which has already been placed cannot be withdrawn. The button is inactive when the numbers are being drawn.</p>
	Repeat	<p>The repeat button becomes available after the first game. Press this button to re-place the bets from the previous game.</p>
	Inner menu	<p>This button shows the number of bets placed. When activated, it displays the current bet combinations and the last bets placed. Each bet goes with its own number and the exact time of drawing according to the player's device. From there the player can see the previous bets, navigate through them with the arrow buttons and pick the same bet combinations again. The button is inactive during the drawing of the numbers.</p>
	Bet settings	<p>Upon activation of this button, different bet values are displayed so the player can choose.</p>
	Additional settings	<p>Upon activation of this button, the "Bet settings" screen is opened. From there the player can change the denomination value and the bet value.</p>
	Collect	<p>When activating the "Collect" button, the entire winning sum is transferred to the current balance.</p>

	Denomination	Displays the value of one credit. By selecting any of the possible options, the player is activating the displayed value.
	Bet value	The amount displayed on each of the "Bet value" buttons is the total amount for one bet.
	Balance	Displays the player's available funds.
	Bet	Displays the amount of the selected bet.
	Menu	By pressing the "Menu" button, the player can enter the "Help", "Game History", "Statistics", "Game payouts" and "Bet settings" screens.
	Settings	Upon activation of this button, the "Bet settings" screen is opened. From there the player can change the denomination value and the bet value.
	Help	When this button is activated, it opens the help screen.
	Game History	When this button is activated, a screen with the numbers drawn from previous games is displayed.
	Statistics	Upon activation of this button, the "Statistics" screen is displayed. From there the player can see the "Hot" and "Cold" numbers for the last 1000 games.
	Game payouts	Upon activation of this button, the payouts table is displayed. It shows how the payouts are calculated depending on the numbers selected by the player and the value of their bet.

	Sound control	Upon activation of the button, the sound of the game is switched on/off, depending on its preceding condition.
	Screen size control	Upon activation of the button, the screen either expands or decreases its size, depending on its current state.
	Exit	When activating this button, the player leaves the game. The button is inactive when the numbers are being drawn. In case a sum is won, during the activation of the button, the won amount is added to the player's balance and the game is closed.

On the top of the game screen, the player can also see the number of the game and the local time according to his/her PC.

## Rules

- Payouts are displayed on the Paytable.
- Malfunction voids all pays and plays.

## Jackpot Cards Bonus

**Jackpot Cards** Mystery is a randomly triggered bonus while any **Jackpot Cards** stamped game is played.

**Jackpot Cards** is a four-level mystery jackpot. Each mystery jackpot level is illustrated by a card suit:

- CLUBS                      1<sup>st</sup> level (the lowest jackpot value);
- DIAMONDS                2<sup>nd</sup> level;
- HEARTS                    3<sup>rd</sup> level;
- SPADES                    4<sup>th</sup> and the highest level.

Each **Jackpot Cards** mystery level value and currency is displayed on the right side of its corresponding card suit symbol.

The contributions to the jackpot levels are calculated based on a percentage of the player's wagering. No amount is deducted from the player's wager.

- **TRIGGERING**

The **Jackpot Cards Mystery bonus** can be randomly triggered after a single game is finished and all resulting winnings are collected. When the **Jackpot Cards Mystery** is triggered, the player is automatically guaranteed one of the mystery jackpot levels.

**Jackpot Cards Mystery** plays on top of the base game and does not close it. The **Jackpot Cards** game can be minimized by clicking anywhere outside it, allowing the player to place bets in the base game even while the bonus game is active. The **Jackpot Cards** game can be finished at a later time at the discretion of the player.

- **RULES AND CONTROLS**

Once triggered, the player is taken to the **Jackpot Cards** bonus game where a pick field made up of 12 cards face-down is displayed. The player selects cards by left-mouse click until revealing 3 matching card suit symbols. The **Jackpot Cards Mystery** level corresponding to the revealed suit will be awarded. The bonus amount will correspond to the amount accumulated at the moment of revealing the last matching symbol. To be able to end the **Jackpot Cards**, the player will be invited to press on “Collect” button, thus adding the bonus game winnings to his/her total balance.

The player has a reasonable chance to win the highest level of the bonus game with any of the qualifying bets, every time he enters the **Jackpot Cards** bonus. However, the higher the qualifying bet in the base game, the higher the chance to enter the bonus and win any one of the mystery jackpot levels.

Qualifying bets: configurable per operator

- **SLOW INTERNET CONNECTION AND DISCONNECTION**

A slow Internet connection could cause a delay and show outdated jackpot values. **Jackpot Cards bonus** supports recovery in case of disconnection.

- **WINNERS**

If any of the jackpot mysteries is awarded, all the players that are playing **Jackpot Cards** stamped games will be notified that such event occurred on their screens.

## **Game Interruptions**

- **Full Game Recovery**

In the event that the game is interrupted due to a connection loss, no data will be lost. Once the game is activated by the player again, it will resume at the present state of the current draw. However, the result of the bet made prior to the connection loss will be saved, and all amounts will be distributed accordingly to the win or loss.

- **Cancellation**

In case the game has been canceled independently from the player, the moment of the cancellation is considered to be the end of the game. Any funds accumulated will be automatically returned to the player.

## **Return to Player**

The average return to Player of the Burning Keno game is 98.18%.
