General description

4 of a King is a 5-reel 3-row slot game with 10 paylines.

All prizes are for combinations of a kind.

Matching symbols should be on enabled paylines and adjacent reels, starting from the leftmost, the rightmost or the middle.

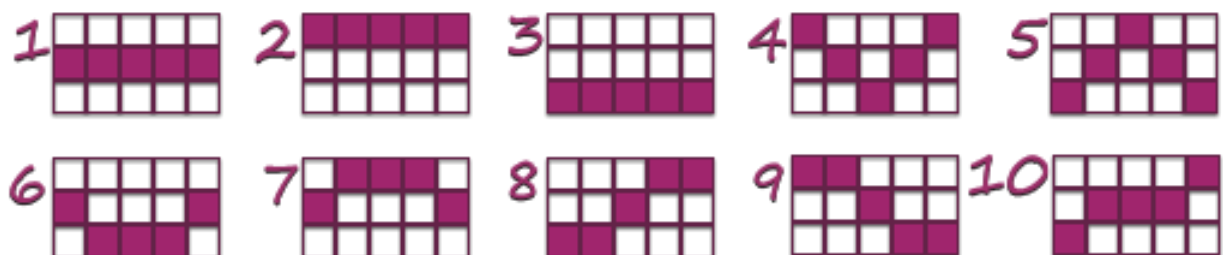

On each enabled payline, only the highest win is paid.

Wins on different paylines are added.

All prizes in the paytable are for the currently selected bet and number of enabled paylines.

All prizes in the paytable are shown in money or credits depending on the currently selected mode.

Expanding Wild

Substitutes for all symbols.

Appears randomly on reels.

Expands over adjacent positions (max resulting wild size is 3 x 3).

Only one expanding wild can appear per spin.

Probability of expanding wild depends on the selected number of lines.

Gamble (Risk Game)

In each game with a non-zero win the Player has a chance to double his win up to 10 times (the maximum number of gamble rounds).

To win a Gamble round, the Player has to beat the Dealer's card by choosing one of four closed cards. If the Player beats the Dealer's card, his win is doubled and he can try again. If the Dealer wins in any round, the Player loses his winnings and the risk game ends.

All closed cards can be higher than the Dealer's card. All closed cards can be lower than the Dealer's card. Cards may re-appear from round to round. The probability of cards being dealt is not equally distributed. The probability of the Player's card rank depends on the currently generated Dealer's card. The Joker beats all other cards. The Dealer can never get a Joker.

Picking a card of the same value as the Dealer's means a draw: the Player's winnings don't change and he can take another attempt.

To decline the game and collect his current winnings, the Player needs to press TAKE WIN.

Average Return to Player is 84%. However, the chances can be higher or lower in every round depending on the Dealer's card:
