

Welcome to the Western Reels rules!

GAME DESCRIPTION

Western Reels is a 3-reel, 5-row video slot. The game is played with 5 fixed paylines.

The game has 6 regular symbols, Wild symbol, Scatter symbol, Empty symbols, Free Spins and the Wheel of Fortune.

The objective is to spin the reels so that the symbols form a winning combination on the existing paylines.

The more expensive symbols in winning combination, the greater the win. The required number of symbols to create a winning combination, win coefficient and paylines are displayed in the Paytable.

FEATURES

Empty symbols

Empty symbols are used throughout the game. Empty and regular symbols alternate sequentially. Five symbols appear on the reel after each spin. Either two or three symbols will be empty.

Two regular symbols in full size will be visible, or alternatively one full size symbol and two partially visible symbols.

Winnings for empty symbols are not provided.

Only regular symbols on winning lines are taken into account in winning combinations. This applies to both regular symbols and the Scatter symbol.

Winning combinations with one Cherry symbol and two of any symbol, as well as two Cherry symbols and one of any symbol are taken into account when any of these symbols appear on winning lines.

An empty symbol cannot be used in combination with other winning symbols.

Wild symbol

Wild symbol substitutes for all regular symbols in winning combinations except Scatter.

Scatter symbol

Appearance of 3 Scatter symbols on the winning lines activates 10 Free Spins.

Only Scatter symbols on the winning lines are taken into account.

Scatter symbols appear only in the main game.

When 3 Scatter symbols appear on the winning lines - the Wheel of Fortune locks and the lights dim.

Wheel of Fortune

There is a Wheel of Fortune in the game.

In every round the Wheel of Fortune is spun along with the reels, but always stops last.

The Wheel of Fortune consists of 12 segments with Multipliers and Respins: x1,+1 SPIN, x2, x3, x4, x5, x1, +1 SPIN, x2, x3, x4, x6.

The winning combination on the reels activates the segment that falls on the Wheel of Fortune, increasing total winnings by a Multiplier or triggering a Respin.

Respin

The activation of a segment +1 SPIN in the winning round triggers one Respin.

Respin is a free round where new winning combinations are possible.

Respin plays with the same Bet as the spin that triggered the feature.

The Wheel of Fortune doesn't spin during Respin.

Segment +1 SPIN falls only in the main game.

Free Spins

There are 10 Free Spins.

Free Spins are played with the same Bet as the spin that triggered them.

In Free Spins the Wheel of Fortune contains segments with Multipliers: x2, x3, x4, x5, x6, x8, x2, x3, x4, x5, x6, x8.

HOW TO CALCULATE THE PAYLINE WINS

- Count the number of identical symbols formed in sequence from the furthest left to the right reel on the payline.
- Check the coefficient for the corresponding number of symbols shown in the Paytable.
- Payline win is equal to the coefficient multiplied by the bet.
- Only the highest win per payline is paid.

RETURN TO PLAYER

The overall theoretical return to player is $[\text{RTP_VALUE}]\%$.

RANDOMISATION

The reels are spun with a fair and equal chance for landing on each stop position thanks to our random number generator. For more information, visit <http://evoplay.games/RNG>.
