GAME RULES

The Player and the Banker are each dealt two cards face up.

Total for the hands is the total of the card values modulo 10.

Ace cards have a value of 1. Each numbered card(2-9) has its face value and face cards (i.e., King, Queen and Jack) will have a value of 0.

If either the Player or the Banker achieves a total of 8 or 9 on the initial deal (known as a "Natural"), no further cards are drawn for both Banker and Player.

Depending on their hands, the Player and/or Banker may have to draw a third card. The hand with the highest total wins.

Play proceeds as follows:

- If the Player has an initial total of 0-5, the Player draws a third card.
- If the Player has an initial total of 6 or 7, the Player does not draw a third card.
- The Banker will draw a third card depending on the Player's hand:
    - If the Player did not draw a card, the Banker draws if he has 0-5.
    - If the Player drew a 2 or 3, the Banker draws if he has 0-4.
    - If the Player drew a 4 or 5, the Banker draws if he has 0-5.
    - If the Player drew a 6 or 7, the Banker draws if he has 0-6.
    - If the Player drew an 8, the Banker draws if he has 0-2.
    - If the Player drew an Ace, 9, 10, or face-card, the Banker draws if he has 0-3.

Game is played with 8 decks of cards. Cards are shuffled at the start of each game.
