VOLATILITY

High volatility games pay out less often on average but the chance to hit big wins in a short time span is higher. Only the highest win is paid per winning combination on the same payline.

When winning on multiple paylines, all wins are added to the total win.

Free spins and bonus wins are added to the payline win.

All wins are multiplied by base bet.

All values are expressed as actual wins in coins.

Free spins win is awarded to the player after the round completes.

Free spins total win in the history contains the whole win of the cycle.

SPACE and ENTER buttons on the keyboard can be used to start and stop the spin.

The theoretical RTP of this game is 96.71%
